## RAPID APP WERKS SERIES

### RAPID RAMP SERVICES

Rapid App Werks' Rapid Ramp Services is a comprehensive onboarding program designed to equip your team with the skills and resources to thrive in the Mendix development environment. We offer a combination of training, hands-on experience, and essential tools to develop your team from Mendix novices to productive application builders.

#### Overview:

#### Rapid App Werks' Rapid Ramp Services include:

- **Rapid Application Developer Training:** A 3-day intensive course that provides a strong foundation in Mendix development principles and best practices. Participants gain the knowledge and skills to design, build, and deploy basic Mendix applications.
- **Enablement and Co-Build:** This allows users to bridge the gap between theory and practice by working alongside Rapid App Werks' Mendix experts within a secure development environment. Your team will co-develop real-world applications in a collaborative environment, leveraging the scalability and elasticity of the cloud for efficient resource allocation, while receiving ongoing support and guidance as they gain practical experience.
- **Office Hours and Continuous Learning:** We provide dedicated office hours for your team to ask questions, troubleshoot challenges, and gain further knowledge from our experts.
- **Starter Application Template:** You can get a head start on development with a pre-built Starter Application. This foundational template includes core styles, themes, reusable components, and modules that can be easily adapted and expanded for your specific needs, saving valuable development time and effort.

#### Investing in Rapid Ramp Services empowers your team to:

- **Become Productive Mendix Developers** by gaining the skills and knowledge to develop powerful and scalable Mendix applications.
- **Reduce Development Time** by leveraging the scalability and elasticity of the cloud to spin up resources quickly and hit the ground running with pre-built templates and expert guidance for faster application development process.
- **Improve Development Efficiency** by collaborating with our experts and leverage pre-built components for efficient and streamlined development. Mendix's collaboration tools foster seamless communication and teamwork throughout the development process.
- **Access Data-Driven Solutions** by integrating your SAP data securely with Mendix applications for valuable insights and optimizing business processes.

#### Next Steps:

We offer comprehensive support throughout your Mendix development journey, from initial planning to ongoing maintenance. Reach out today to Titan Consulting/Rapid App Werks for a free consultation to discuss your Mendix support needs, receive a customized quote, and explore how we can empower your team on your Digital Transformation journey.
