EASYAPPS SERIES: EASYINVOICE

THE EASY WAY TO AUTOMATE ACCOUNTS PAYABLE FOR SAP ECC OR S/4HANA

– Keith Johnson, Practice Manager

Are you struggling to justify your Accounts Payable automation project? You've probably heard the all too common stories of companies spending hundreds of thousands of dollars, only to achieve a 15% hands-free hit rate.

Is technology changing so fast that it's hard to know which solution is right for your business?

easyInvoice is the simplest way to automate accounts payable and delivers the best value and ROI in the SAP market by:

- Automating AP to take advantage of available discounts and improve working capital.
- Leveraging next-generation technology, including machine learning and smart rules, to streamline processes and boost your hit rate.

- Giving management clear visibility into KPIs such as accruals, process bottlenecks, and improvements in efficiency.

Features and capabilities:

- Next Generation Machine Learning automates the Invoice Entry Process.
- Supports email, pdf, fax, snail mail, and scanned documents.
- Workflow approval routing based on your organization structure.
- Cross-platform capabilities mobilizes your approval process.
- Notifications, alerts, and reminders for approvers and processors.
- Integrates with SAP ECC and S/4HANA.
- Utilizes SAP Authorization rules.
- Designed for centralized or de-centralized AP departments worldwide.

RECEIVE

Receive Invoice: Via email, PDF, spreadsheets, and snail mail

Recognize: Smart Rules reads, interprets, and populates the vendor and invoice details including GL Accounts and Cost Objects

RECOGNIZE

REVIEW

Review and Approve: Match invoices with purchase orders, route non-PO invoices for approvals, view status of invoice approvals in-process

Post: Once approved, post your invoices into SAP along with scanned documents and workflow approval logs

POST

TITAN
